Mean Stack Development:	MongoDB, Express, Angular.js, and node.js
Development Tools:	Microsoft Expression Web, Visual Studio, Visual Studio Code, Android Studio, Eclipse, Visual Paradigm, Visio, and IntelliJ.

EDUCATION:

Software Engineering Technology Advanced Diploma   Sept. 2016 Present
Centennial College, Toronto, Ontario   **Expected Graduation: April 2019**
Overall GPA 4.027/4.5 – maintaining honours status throughout the course

ACADEMIC PROJECTS:

Flash Chat App: Winter 2018

Developed Flash Chat app, a real massaging app like WhatsApp or Facebook messenger. For creating this app, I used Java, XML, and google Firebase database for storing user SMS and credentials. The purpose of this app to create something comparable to Facebook massager.

WorkForce API: Fall 2018

Developed WorkForce web API for unemployed educated people who are looking for a job. For developing the WorkForce API, we used, C# .Net Core2.1, AWS-RDS, swagger, JSON, XML, Postman, Apigee API management platform, and hosted on AWS Elastic Beanstalk.

eAppointment: Fall 2017

Designed this development project as group for an online doctor appointment application with eight subsystems which will enable users to find the nearest doctors and at the earliest possible time to set doctor's appointments. Used, UML Language, and Agile methodology.
